In recent years, the development of tourism themes and routes has gained prominence with the key aim of bundling services and attractions under a unifying subject and for promotion purposes. These themes bridge the gap between a destination’s tangible and intangible features and are designed to appeal to specific visitor segments interested in gathering unique experiences on topics such as culture, history, heritage, nature, sports, gastronomy, religion or health. This two-day seminar is the exceptional occasion to officially launch the brand new ETC-UNWTO Handbook on Marketing Transnational Tourism Themes & Routes. This event will provide insights into the development, management and promotion of transnational tourism themes and routes in Europe and worldwide as well as practical guidance for DMOs, NTOs and NTAs on how to market and promote destinations through transnational thematic tourism experiences and products. The seminar will also serve as an excellent platform for exchange of best-practices showcasing the different approaches taken by different destinations.
