PRESS RELEASE

ADEQUATE SUPPLIES IN GREECE

The Ministry for Economy, Infrastructure, Shipping and Tourism would like to reassure visitors to Greece that hotels, restaurants, shops and supermarkets have adequate food supplies, the prices of which have remained stable if not reduced as in the case of fresh fruit and vegetables. This is also the case for fuel, as gas stations are adequately stocked and prices remain unchanged.

Any reports stating the opposite are not reflecting the actual situation on the ground.

The Ministry for Economy via the General Secretariat for Commerce is working closely with local authorities and food companies and has taken all the necessary steps to ensure the supply of goods to the Greek market continues to operate as normal so that demand is entirely covered not only for the Greek people but also for the numerous visitors who have chosen Greece for their holidays.
